Model Performance Testing

Project team shall fill the following information in the model performance testing template. The content is taken from the supplied main problem statement.

S.No.	Parameter	Values	Screenshot
1	Model Summary	ServiceNow Flow Designer automation for standard laptop procurement. The workflow creates a Catalog Task after approval, updates the short description and description, assigns the task to the Hardware group, and supports timely laptop configuration. The flow is named “Standard laptop task”, uses a Service Catalog trigger, and creates a Catalog Task with Approval = Approved and Assignment group = Hardware.	Fig. 1–3
2	Accuracy	Not specified in the provided problem statement. No training accuracy, validation accuracy, or numerical model-accuracy metric is given.	N/A
3	Confidence Score (Only YOLO Projects)	Not applicable. This is a ServiceNow Flow Designer automation project, not a YOLO object-detection project.	N/A

Problem Statement Basis

The current IT procurement process lacks efficiency and automation, resulting in delays and manual overhead, particularly in handling standard laptop orders. Standard laptop requests often require configuration, but this step is prone to oversight or delay, leading to frustration among users and inefficient resource allocation within the IT department.

User Story

As a member of the IT procurement team, the goal is to streamline standard laptop ordering so tasks are automatically generated and assigned to the Hardware team for configuration, ensuring laptops are promptly configured upon arrival and reducing user wait times and manual intervention.

Project Objective

- Create a seamless experience for users requesting standard laptops by ensuring timely configuration.
- Reduce manual intervention and potential errors in the procurement process.
- Improve resource utilisation within the IT department by optimising task allocation.
- Enhance overall efficiency and productivity in IT procurement operations.

Implementation Screenshots / Evidence

Screenshots below are extracted from the supplied project document and correspond directly to the documented workflow.

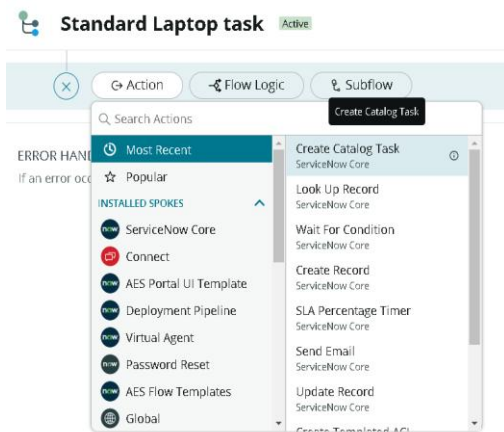

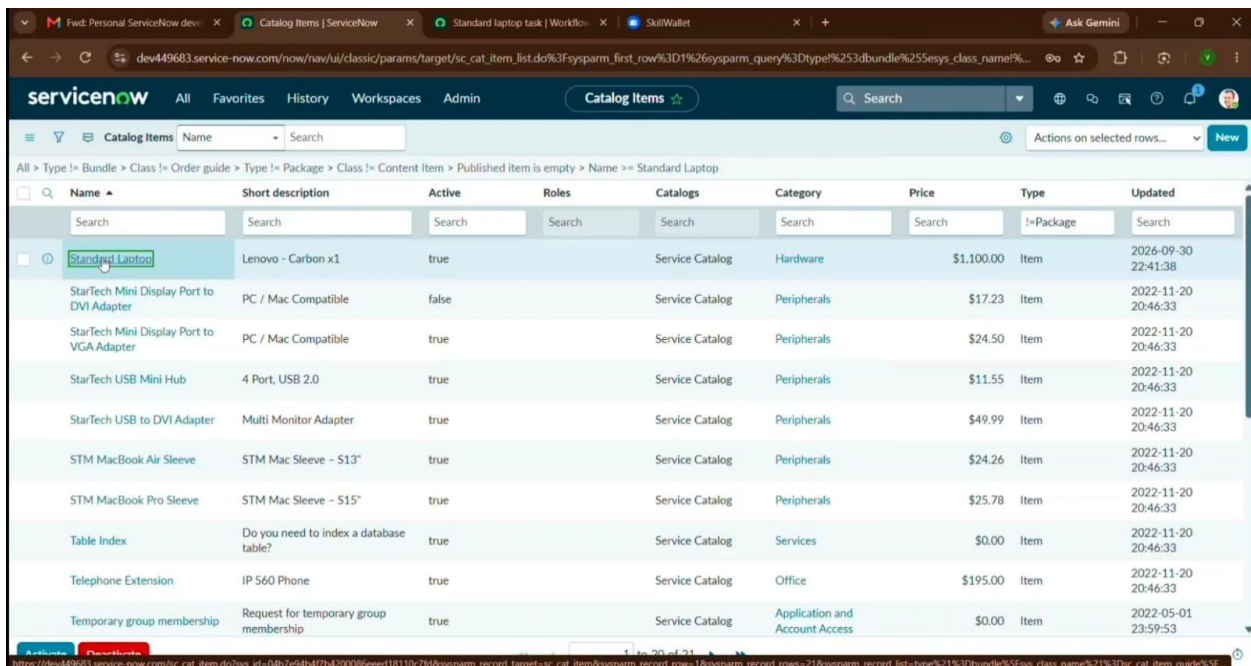

Figure 1. Flow Designer – “Standard laptop task” with the Create Catalog Task action.

Name	Short description	Active	Roles	Catalogs	Category	Price	Type	Updated
Standard Laptop	Lenovo - Carbon x1	true		Service Catalog	Hardware	\$1,100.00	Item	2026-09-30 22:41:38
StarTech Mini Display Port to DVI Adapter	PC / Mac Compatible	false		Service Catalog	Peripherals	\$17.23	Item	2022-11-20 20:46:33
StarTech Mini Display Port to VGA Adapter	PC / Mac Compatible	true		Service Catalog	Peripherals	\$24.50	Item	2022-11-20 20:46:33
StarTech USB Mini Hub	4 Port, USB 2.0	true		Service Catalog	Peripherals	\$11.55	Item	2022-11-20 20:46:33
StarTech USB to DVI Adapter	Multi Monitor Adapter	true		Service Catalog	Peripherals	\$49.99	Item	2022-11-20 20:46:33
STM MacBook Air Sleeve	STM Mac Sleeve - S13"	true		Service Catalog	Peripherals	\$24.26	Item	2022-11-20 20:46:33
STM MacBook Pro Sleeve	STM Mac Sleeve - S15"	true		Service Catalog	Peripherals	\$25.78	Item	2022-11-20 20:46:33
Table Index	Do you need to index a database table?	true		Service Catalog	Services	\$0.00	Item	2022-11-20 20:46:33
Telephone Extension	IP 560 Phone	true		Service Catalog	Office	\$195.00	Item	2022-11-20 20:46:33
Temporary group membership	Request for temporary group membership	true		Service Catalog	Application and Account Access	\$0.00	Item	2022-05-01 23:59:53

Figure 2. ServiceNow Catalog Items – Standard Laptop item under the Hardware category.

The screenshot displays a ServiceNow Catalog Task form for SCTASK0010001. The form is titled "Catalog Task - SCTASK0010001" and includes a search bar and navigation links. The form fields are organized into sections:

- Header Section:**
 - Number: SCTASK0010001
 - Assigned to: [Searchable field]
 - Configuration item: [Searchable field]
 - Active: ☒
 - Approval: Approved
 - Priority: -- None --
 - State: Open
 - Request item: RITM0010001
 - Requested for: System Administrator
- Description Section:**
 - Short description: Laptop need to Configured
 - Description: Laptop need to Configured
 - Comments (Customer visible): [Text area]
- Activities Section:**
 - Activities: 1
 - System Administrator
 - Impact: 3 - Low
 - Opened by: System Administrator
 - State: Open

The form also includes buttons for "Discuss", "Follow", "Update", "Close Task", and "Delete". A "Post" button is visible next to the "Work notes" checkbox.

Figure 3. Resulting Catalog Task showing Approval = Approved and “Laptop needs to Configured”.

Conclusion

By automating the standard laptop procurement process with ServiceNow Flow Designer, the project addresses inefficiencies and reduces manual overhead. The workflow supports timely configuration, minimises user wait times, optimises resource allocation, and improves productivity within the IT department.

User Acceptance Testing (UAT) Template

Date	03 October 2026
Team ID	SWUID2026355799
Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Maximum Marks	10 Marks

Project Overview:

Project Name: Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer

Project Description: ServiceNow Flow Designer automates standard laptop procurement, approval, catalog-task creation, and assignment to the Hardware group for configuration.

Project Version: 1.0

Testing Period: To be completed during User Acceptance Testing

Testing Scope:

- Standard Laptop request through Service Catalog.
- Service request approval.
- Automatic Catalog Task creation after approval.
- Short description and Hardware assignment group update.
- Timely configuration and reduced manual intervention.

Testing Environment:

URL: <https://dev449683.service-now.com/> Location: ServiceNow / Flow Designer

Credentials: Not specified in the main problem statement

Test Cases:

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
TC-001	Place Standard Laptop request	Service Catalog → Hardware → Standard Laptop → Order Now	Request is submitted and order status is displayed.	To be recorded during UAT	Pending

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
TC-002	Approve request	Open Request Number → Approvers → Approve	Approval becomes Approved and the Requested Item can be opened.	To be recorded during UAT	Pending
TC-003	Verify Catalog Task	Open Requested Item → Catalog Tasks	Task shows the required short description and Hardware assignment group.	To be recorded during UAT	Pending

Bug Tracking:

Bug ID	Bug Description	Steps to reproduce	Severity	Status	Additional feedback
BG-001	No bug reported in the supplied project statement.	Record steps if an issue is found during UAT.	N/A	Not reported	Record details if found.

Sign-off:

Tester Name: To be completed by tester

Date: To be completed on test completion

Signature: To be completed by tester

Notes:

- Test both positive and negative scenarios for the standard laptop request workflow.
- Verify approval is completed before the automated Catalog Task is created.
- Verify the Catalog Task short description is updated as specified.
- Verify the Assignment group is set to Hardware.
- Record defects with severity, status, and steps to reproduce.
- Obtain project-manager and product-owner sign-off before deployment.

Source basis: uploaded UAT template and supplied main problem statement.

Actual UAT results, tester identity, credentials, and defects are not provided in the source.
